CLEANROOM DIGITAL PRINTING & INLINE CUTTING

Our digital printer with integrated stamping produces the following under clean room conditions:

- Printing from roll to roll
- Printing and cutting from roll to cut-out
- Printing and stamping from roll to stamped lids
- Stamping from roll to stamped lids

Advantages:

- efficient production; the lids are printed and stamped in a single work process
- processing in the clean room cabin
- low initial costs; no printing plates are required
- small print runs are possible
- better use of material; the material is processed directly from the film
- personalisation of prints; bar codes, consecutive numbering or images are possible

We are happy to help you compile professional printing data.

Technical data

max. web width:	330 mm
min. web width:	100 mm (narrower widths can be produced on the roll cutter in another work step)
