It was not only the coronavirus which characterised 2020 – there were also other topics, which we tackled.

"Going against the flow" – we have taken this expression to heart and – contrary to what normally happens in a crisis – we are investing in the construction of a **new cleanroom**.

What prompted us to implement such a project during these uncertain and difficult times?

The increased demand for medicinal packaging requires a larger production area. In addition, our first cleanroom has reached the end of its lifetime and needs to be replaced.

NEW CLEANROOM

New Cleanroom / Outside

New Cleanroom / Inside

FACTS

Production area:	330 m ²
Production:	Blister / Special solutions / Innovations <i>We will inform our customers individually about any changes nearer the time.</i>
Clean room quality:	ISO Klasse 8

ADVANTAGES

- Shorter delivery times
- Larger production capacity
- Optimised work procedures
- Light, new workstations

ENVIRONMENT & ENERGY

We care about the future

We are aware of our responsibility towards society and the environment. Sustainability and resource-saving production are important aspects for Medipack, which we allow to flow into our innovations, developments and processes.

We go into more detail in our document [Environment & Energy](#).
