

**Produktbeschreibung / Product description**

**Einsatz**

Das Produkt ist für die Herstellung medizinischer und pharmazeutischer Verpackungen entwickelt worden. Die Materialien entsprechen den gültigen gesetzlichen und normativen Anforderungen.

**Use**

The product is designed for the manufacture of medical and pharmaceutical packaging. The materials comply with the applicable legal and normative requirements.

**Grunddaten**

<b>Material</b>	PETG
<b>Lieferbare Dicken</b>	0.25mm – 1.20mm
<b>Farbe(-n)</b>	transparent, blau getönt, weiss

**Basic Data**

<b>Material</b>	PETG
<b>Available Thickness</b>	0.25mm – 1.20mm
<b>Color(-s)</b>	transparent, blue tinted, white

**Typische Anwendung**

Thermotiefgezogene Blisterschale für medizintechnische Verpackungen.

**Typical Application**

Thermoformed blister tray for medical packaging.

<b>Funktionseigenschaften</b>
sehr gute Transparenz
hervorragende Thermoform – Eigenschaften
Zähigkeit
keine Silikonbeschichtung
hohe Sterilisationsresistenz
für die Entstapelung ist ein Antiblock integriert

<b>Functional Characteristics</b>
very good transparency
excellent thermoforming properties
toughness
no silicone coating
high resistance to sterilisation
an antiblock is integrated for destacking

<b>Geeignete Sterilisationsmethoden</b>
Gamma Sterilisation: 25kGy – 50 kGy
EO-Sterilisation, empfohlene Sterilisationsparameter: max.54°C bei max. 50%rH

<b>Applicable Sterilization Process</b>
Gamma sterilization: 25kGy – 50 kGy
EO sterilization, suggested sterilization parameters: max. 54°C at max. 50%rH

**Lagerbedingungen**

Vor direktem Licht geschützt und in der Originalverpackung in einem sauberen und trockenen Raum aufbewahren. Nicht direkter Hitze aussetzen. Nicht im gleichen Raum mit Lösungsmitteln oder Chemikalien lagern.

**Storage Condition**

Storage in original packaging in a clean, dry environment away from direct exposition to light. Avoid any direct heat. Not to be stored together with solvents or chemicals in the same room.

<b>Empfohlene Lagerbedingungen</b>	
Temperatur	10°C – 30°C
relative Luftfeuchtigkeit	< 50% rH

<b>Recommended Storage Conditions</b>	
temperature	10°C – 30°C
relative humidity	< 50% rH

**Haltbarkeit**

Das Material hat bei richtiger Lagerung gemäss den Bedingungen aus diesem Datenblatt eine Haltbarkeitsdauer von 5 Jahren nach Herstellungsdatum.

Bei Verwendung des Produkts als Bestandteil eines Sterilbarriersystems, muss der Anwender selbst die Haltbarkeit des Verpackungssystems gemäss der EN ISO 11607 für seine spezifische Anwendung in einer Validierungsstudie nachweisen.

**Verarbeitungsbedingungen**

Da das Material als Teilkomponente eines Sterilbarriersystems vorgesehen ist, sind auch die in der Medizintechnik und Pharmazie üblichen Bedingungen gute Grundbedingungen für die Verarbeitung der Folie. Übermässige Kälte, Wärme oder hohe Luftfeuchtigkeit sollte daher vermieden werden. Die entsprechenden Herstellungsparameter für die Formgebung und Siegelung zur Herstellung eines medizintechnischen Sterilbarriersystems sind innerhalb einer entsprechenden Prozessvalidierung zu ermitteln und festzulegen (kundenseitig).

**Shelf – life**

If stored correctly in accordance with the conditions in this data sheet, the material has a shelf life of 5 years from the date of manufacture.

If the product is used as part of a sterile barrier system, the user himself is responsible to demonstrate shelf life of the packaging system according to EN ISO 11607 for his specific purpose through a validation study.

**Processing Conditions**

As the material is intended as a sub-component of a sterile barrier system, the usual conditions in medical technology and pharmaceuticals are also good basic conditions for processing the film. Excessive cold, heat or high humidity should therefore be avoided. The corresponding manufacturing parameters for shaping and sealing for the production of a medical-technical sterile barrier system must be determined and specified as part of a corresponding process validation (by the customer).

<b>Das Material ist zur Bildung einer Sterilbarriere mit folgenden Komponenten geeignet</b>	z.B. beschichtetem Tyvek, Papier/Alu/PE ect.
---	--

<b>The material is suitable for forming a sterile barrier with the following components</b>	e.g. coated Tyvek, paper/aluminum/PE etc.
---	---

## Technische Spezifikationen / Technical specifications

**Zusammensetzung**

Die Folien bestehen zu 20% bis 100% aus Regranulat aus innerbetrieblichen Verarbeitungsresten.

**Compound**

The films consist of 20% to 100% recycled pellets from in-house processing waste.

<b>Hauptbestandteile der Folie</b>
Ausgangsgranulat: Copolyester Eastar™ 6763

<b>Ingredients of Film</b>
Starting granules: Copolyester Eastar™ 6763

<b>Granulatzusätze</b>	
Mattierung	SUKANO® G cc S145
Antiblock-Zusatz:	SUKANO® G dc S239

<b>Granulate additives</b>	
satin finish	SUKANO® G cc S145
antiblock additive:	SUKANO® G dc S239

<b>Farbpigment</b>	
blau getönt	SUKANO® G cc T24845-SP
weiss	SUKANO® G cc S203

<b>Colour additive:</b>	
blue tinted	SUKANO® G cc T24845-SP
white	SUKANO® G cc S203

### Physikalische Eigenschaften

Eigenschaft	Testmethode	Typische Werte
Dichte <sup>1)</sup>	ISO 1181-1:2002	1,20 g/cm <sup>3</sup>

### Biocompatibility

For the following biocompatibility tests see  
 Certification (gem. ISO 10993-5) according  
 to the various standards mentioned.

### Biocompatibility

For the following biocompatibility tests see  
 Certification (according to the standards mentioned) and the standards mentioned.

## Zertifizierungen und Konformität / Certifications and conformity

### Regulatorischer Status

The film MEDPACK 6763 R-Line acts as film for heat-sealable packaging (1.1.2017/2018) and is also suitable for packaging systems (e.g. bag-in-box systems), when it is used as film for heat-sealable packaging systems, systems and constructions. It is approved for use in pharmaceutical packaging systems (e.g. bag-in-box systems) and for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems. It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

### Konformität

The film MEDPACK 6763 R-Line is suitable for use in pharmaceutical packaging systems (1.1.2017/2018) and for use in the production of pharmaceutical packaging systems. It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems. It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems. It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

### Regulatory Status

MEDPACK 6763 R-Line acts as film for heat-sealable packaging (1.1.2017/2018) and is also suitable for packaging systems (e.g. bag-in-box systems), when it is used as film for heat-sealable packaging systems, systems and constructions. It is approved for use in pharmaceutical packaging systems (e.g. bag-in-box systems) and for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

### Conformity

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product complies with the requirements of the European Pharmacopoeia (Ph. Eur.) and the requirements of the European Pharmacopoeia (Ph. Eur.). It is approved for use in the production of pharmaceutical packaging systems and for use in the production of pharmaceutical packaging systems.

The product contains some bisphenol. As all bisphenol is bisphenol-A, the bisphenol-A content is 0.1% of the film. In accordance with the standard, the bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film.

The product contains some bisphenol-A. The bisphenol-A content is 0.1% of the film. In accordance with the standard, the bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film.

The product does not contain any bisphenol-A. The bisphenol-A content is 0.1% of the film. In accordance with the standard, the bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film.

The product does not contain any bisphenol-A. The bisphenol-A content is 0.1% of the film. In accordance with the standard, the bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film.

The product does not contain any bisphenol-A. The bisphenol-A content is 0.1% of the film. In accordance with the standard, the bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film. The bisphenol-A content is 0.1% of the film.

The product complies with the provisions of the following directives:

Regulation Article	Description
Regulation 2017/2100 (REACH)	Restriction of hazardous substances
Directive 2002/95 (RoHS)	Restriction of hazardous substances
Regulation 1005/2008	Restriction of hazardous substances

**Technischer Hinweis**

The basic technical information contained in these documents and drawings by NEOPACK S. R.L. are valid for general technical information and do not constitute a guarantee for any specific manufacturing cycle or device. Technical notes prepared for the specific manufacturing cycle or device are subject to change without notice. It is the user's duty to give independent measurements when and where necessary.

**Legal Disclaimer**

The information contained herein is based on the best knowledge and experience of NEOPACK S. R.L. It specifically denies assurance of specific information or suitability for a particular application cannot be derived from the data sheet. The customer must independently verify whether our product is able and technically suitable for his intended application.

**Sicherheitsinformationen / Safety information****Sicherheitsanweisung**

Es sind keine Gefahren bekannt und die Material wird als nicht brennbar und umweltschonend eingestuft. Das Produkt gilt als nicht gefährlicher Stoff und unterliegt daher nicht der Befreiung von Sicherheitsdatenblättern (SDS) gemäß (REACH) Regel 1272000002 Standard EN19 07 10 1014 1200, der Richtlinie der Europäischen Union über gefährliche Stoffe und Zubereitungen (2002/2000/EG), der Richtlinie der Europäischen Union (2007/2000/EG) zur Durchführung der Befreiung von Leistung 8 der Verordnung (2007/2000/EG) der Europäischen Union zur Registrierung, Bewertung, Zulassung und Beschränkung Chemischer Stoffe (REACH).

**Safety instructions**

There are no known hazards and experience has shown the material to be non-flammable and non-hazardous to the environment. The product is considered a non-hazardous article and a substance not subject to the restrictions of Safety Data Sheet (SDS) according to REACH Regulation (Commission Regulation (EC) No 1831/2003), the European Union Directive on Hazardous Substances and Mixtures (2002/2000/EC), the European Union Directive on Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) and the Commission Regulation (EC) No 1831/2003 implementing Annex II to Regulation (EC) 1831/2003 of the European Parliament and of the Council on the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH).

Bei Bedarf kann nachfolgendes Sicherheitsdatenblatt (SDS) angefordert werden: [germany@neopack.com](mailto:germany@neopack.com) oder [neopack@neopack.com](mailto:neopack@neopack.com). Technische Datenblatt kann heruntergeladen werden unter [www.neopack.com](http://www.neopack.com), angefordert wird bitte Material-Namen und Art angeben.

In case of the safety document (SDS) request, please contact [germany@neopack.com](mailto:germany@neopack.com) or [neopack@neopack.com](mailto:neopack@neopack.com). The technical data sheet can be downloaded under [www.neopack.com](http://www.neopack.com). When requesting, please specify the product, your destination with city and state and your contact person.
